SEIZURE PROTOCOL

Instructions for Nurse/Caregiver: Enter any and all information that a nurse or caregiver should know when handling a seizure, including:

- ▶ Medications, dosage, and administration
- ▶ How to physically interact with the patient (ie, lay on side, check for breathing)
- ▶ When/how to contact parents, 911, and where to transport patient, if needed (hospital or medical center)

INSTRUCTIONS FOR EMS AND ER

Enter any and all information that EMS personnel and ER doctors should know when interacting with patient having a seizure, including:

- ▶ Patient's specific diagnosis (ie, Dravet syndrome)
- ▶ Recommended rescue medication and dosage/administration
- ▶ Other medications patient is taking
- ▶ Any other important information
